I support the XM Radio provision of traffic and weather. The reason I support XM Radio fully is that the "news" and other clutter that I had to be subject was not acceptable any longer. I certainly did not like the endless commercials, but mostly, I could not accept the slanted news that was being provided, especially on NPR. The endless partisan newscasting was more than I could take. Usually, I had to turn my car radio off to avoid the marketing I was hearing. XM Radio offers me my choice of what I want to hear. That is a freedom I did not have before, and I am more than willing to pay for it.
